

OUR ENVIRONMENTAL POLICY - 2024 -

The General Management of Aqua Mirage Marrakech, aware of the need to carry out its activities with all due respect for the environment, is determined to comply, in an effective manner, with the following environmental principles:

Comply with environmental legislation applicable in Morocco.

To rationalise and make good use of natural resources, in order to reduce our impact on the environment, to reduce the consumption of resources and to promote energy savings and efficiency in our facilities by :

- Installing energy-saving equipment throughout the facility.
- Actively monitoring energy consumption to keep it at a minimum.
- Making it a priority to choose durable, low-energy consumption equipment when making new purchases.
- Promoting water and electricity saving practices to all our employees and customers by displaying information in departments, rooms and public areas.
- Reducing waste production.

Actively **promote** environmental education and awareness among employees and customers by separating the different waste streams and providing easy access to the appropriate recycling bins, as well as providing information to our customers and a fun introduction to the youngest.

Prevent pollution at all times, by implementing all necessary measures to reduce environmental effects and prevent the potential for accidents to have an environmental impact.

Train employees on a daily basis about our environmental objectives and the contribution they can make to this policy. Encourage customers to support us in our objectives through sustainable communication.

Continuously update our environmental programme by setting targets as part of our environmental management system and providing information on all actions taken within our facility.
